

What is Claimed is:

1 1. A polarizer, comprising:
2 a quartz substrate part comprising a plurality of quartz substrate stacked on top of
3 one another; and
4 a polarizer holder supporting the quartz substrate part.

1 1/2. A polarizer, comprising:
2 a plurality of quartz substrate parts, each quartz substrate part including one or
3 more quartz substrates; and
4 a polarizer holder supporting said plurality of quartz substrate parts.

1 2/3. The polarizer according to claim 1, wherein the quartz substrate part has a
2 rectangular structure.

1 3/4. The polarizer according to claim 1, wherein the quartz substrate part has triangular
2 structure.

1 4/5. The polarizer according to claim 1, wherein the quartz substrate part has a
2 parallelogram structure.

1 ~~6. The polarizer according to claim 2, wherein the polarizer holder has a lattice-like~~
2 ~~structure.~~

1 5. The polarizer according to claim ¹2, wherein the quartz substrate part comprises a
2 plurality of quartz substrates stacked on top of one another.

1 6. The polarizer according to claim ¹2, wherein the polarizer holder includes an
2 optically absorptive material.

1 7. The polarizer according to claim ¹2, wherein each of said plurality of quartz
2 substrate parts is placed at a non-zero angle relative to a normal line of the surface of the
3 polarizer holder.

1 8. The large scale polarizer according to claim ¹2, wherein each of said plurality of
2 quartz substrate parts is placed at the Brewster's angle relative to a normal line of the surface of
3 the polarizer holder.

1 9. A polarizer system, comprising:
2 a light source for generating a light;
3 a quartz substrate part comprising a plurality of quartz substrates stacked on top of
4 one another; and
5 means for directing said light onto said quartz substrate part.

1 ~~10~~ ¹². A polarizer system, comprising:
2 a light source for generating a light;
3 a plurality of quartz substrate parts, each quartz substrate part including one or
4 more quartz substrates;
5 a polarizer holder supporting said plurality of quartz substrate parts; and
6 means for directing said light onto said plurality of quartz substrate parts.

1 ~~11~~ ¹³. The polarizer system according to claim ~~12~~ ¹⁰, wherein the quartz substrate part has
2 a rectangular structure.

1 ~~12~~ ¹⁴. The polarizer system according to claim ~~12~~ ¹⁰, wherein the quartz substrate part has
2 a triangular structure.

1 ~~13~~ ¹⁵. The polarizer system according to claim ~~12~~ ¹⁰, wherein the quartz substrate part has
2 a parallelogram structure.

1 ~~16~~. The polarizer system according to claim ~~12~~ ¹⁰, wherein the polarizer holder has a
2 lattice-like structure.

1 ~~14~~ ¹⁷. The polarizer system according to claim ~~12~~ ¹⁰, wherein each quartz substrate part
2 comprises a plurality of quartz substrates stacked on top of one another.

1 ~~16~~ ¹⁰18. The polarizer system according to claim ~~12~~, wherein said means for directing said
2 light collimates said light.

1 ~~17~~ ¹⁰19. The polarizer system according to claim ~~12~~, wherein said means for directing said
2 light collimates said light and the quartz substrate part partially polarizes said collimated light.

1 ~~18~~ ¹⁰20. The polarizer system according to claim ~~12~~, wherein each of said plurality of
2 quartz substrate parts is placed at a non-zero angle relative to a normal line of the surface of the
3 polarizer holder.

1 ~~19~~ ¹⁰21. The polarizer system according to claim ~~12~~, wherein each of said plurality of
2 quartz substrate part is placed at the Brewster's angle relative to a normal line of the surface of
3 the polarizer holder.

1 ~~20~~ ¹⁰22. The polarizer system according to claim ~~12~~,
2 wherein the polarizer holder includes an optically absorptive material.

1 ~~15~~ ¹⁴23. The polarizer system according to claim ~~17~~,
2 wherein each quartz substrate part includes means for partially polarizing said
3 light, and wherein the degree of partial polarization depends on the number of said quartz
4 substrates stacked on top of one another.

1 24. A polarizer system, comprising:
2 a light source for generating a light ;
3 a plurality of quartz substrate parts, each quartz substrate part having one or more
4 quartz substrates;
5 a polarizer holder supporting said plurality of quartz substrate parts;
6 means for directing said light onto said plurality of quartz substrate parts;
7 a moving control part coupled to and moving the polarizer holder to uniformly
8 irradiate an area underneath said plurality of quartz substrate parts and said polarizer holder.

1 25. The polarizer system according to claim 24,
2 wherein the moving control part includes means for oscillating the polarizer
3 holder.

1 26. The polarizer system according to claim 24,
2 wherein the moving control part includes:
3 a first moving control part moving the polarizer holder in a first direction parallel
4 to the surface of the polarizer holder; and
5 a second moving control part moving the large scale polarizer in a second
6 direction parallel to the surface of the polarizer holder and perpendicular to the first direction.

1 27. A polarizer system, comprising:
2 a light source for generating a light;
3 a lens for collimating said light;
4 one or more sets of plurality of quartz substrate parts, each quartz substrate part
5 having one or more quartz substrates; and
6 one or more polarizer holders supporting respective one or more sets of plurality
7 of quartz substrate parts, wherein zero or more of said one or more polarizer holders are placed
8 between the light source and the lens, and wherein zero or more of said one ore more polarizer
9 holders are placed after the lens.
